With Hoffman Cooling (formerly McLean) Pentair helps create optimal conditions for the reliable operation of electronic and electrical components in manufacturing controls, telecom equipment, data networks, and other vital systems. From standard fan assemblies to air conditioners, to heat exchangers, to integrated cooling enclosures for a variety of applications, Pentair assures maximum productivity and uptime while protecting the life cycles of controls and equipment.

Flawless operation is the expectation of OEMs, engineers, and end-users alike. That’s why choosing the most qualified cooling technology provider reaches far beyond the implications of product performance to include service and support benchmarks. As a premier global provider with decades of experience in cooling industrial automation and electrical components, Hoffman remains unrivaled with an industry-leading portfolio of proven products, pre- and post-sale support, and comprehensive engineering and testing services.
BETTER TOGETHER
MCLEAN® IS NOW HOFFMAN COOLING

REASONS TO CHOOSE HOFFMAN FOR YOUR COOLING SOLUTION
• Cooling specification is easier with energy-efficient, maintenance-friendly air conditioners in over 1,000 standard configurations
• Cooling products are stocked locally and supported by over 2,000 distributors in North America and regional stock worldwide for quick availability
• Easy upgrades to the latest Hoffman cooling technology from competitive or obsolete air conditioners with Hoffman Easy Swap™ adaptor plenums
• On-site thermal audits and consulting
• Available modifications including sizing, adaptation, power, custom paint, and accessories
• State-of-the-art, in-house laboratory testing, validation, and global agency certification services
• Complete custom engineering services for non-standard requirements

THE ADVANTAGES OF ENCLOSURES WITH INTEGRATED COOLING SOLUTIONS
The integration of Hoffman enclosures and cooling offers best-of-class performance and protection.
• Advanced cooling products designed to complement our offering of standard enclosures
• Thermal load pre-calculation to provide optimum cooling options for components, enclosure package, and environment
• Ensures complete solution is engineered to maintain rating and certification
• Single-source accountability for support and service
• Ease of specification, ordering, and purchasing
• Reduced lead times and elimination of miscommunication between multiple vendors

Pentair assures maximum productivity and uptime while protecting the life cycles of controls and equipment.
WHY USE COOLING?
HEAT DAMAGES AND REDUCES THE LIFE OF YOUR ELECTRONICS

Keeping your electronics cool is essential to maximizing the life cycles of your electronic devices, reducing capital expenses, and keeping your business running. Heat can have a significant impact on electronics, reducing performance, causing damage, and affecting manufacturer warranties.

CONSEQUENCES OF HEAT
Heat build-up can adversely affect industrial controls creating the potential for
• De-rated drive performance
• Intermittent fluctuations in I/C-based devices
• MTBF decreases exponentially
• Catastrophic component failure

GET THE PERFECT COOLING SOLUTION

HOFFMAN COOLING
A WIDE RANGE OF THERMAL MANAGEMENT SOLUTIONS FOR CRITICAL APPLICATIONS

ENVIRONMENTALLY FRIENDLY AIR CONDITIONERS FOR RUGGED ENVIRONMENTS
Delivering reliable enclosure cooling in the most extreme indoor and outdoor environments, Hoffman SpectraCool™ Air Conditioners feature a new, filterless design that reduces clogging, which can cause system failures. With its energy-efficient compressor and earth-friendly refrigerant, SpectraCool air conditioners are available in three configurations that offer a broad range of cooling capacities, power input, and mounting options.

FEATURES
• Models with 293 to 5,861 Watt (1,000 to 20,000 BTUs/h) cooling power for indoor, outdoor, and harsh environments
• Standard, Narrow, and Compact configurations
• Compressors that deliver up to 23 percent greater energy efficiency
• Wide range of outdoor operating temperatures: -40 °C to 55 °C (-40 °F to 131 °F)
• Dust-resistant coil design supports filterless operation in most environments
• 115, 230 or 400/460 3-phase VAC power supply
• Integrated active condensate evaporator with heater strip
• R134a and R407c earth-friendly refrigerant
• Built-in flanges for easy installation

A BOLT-ON UPGRADE SOLUTION FROM OLDER A/C UNITS
When older model air conditioners need to be replaced, Hoffman Easy Swap™ adaptor plenums provide a quick and easy way to upgrade to a state-of-the-art Hoffman SpectraCool unit using the existing enclosure cut-out with no modifications needed.

FEATURES
• Get the A/C you need with the enclosure you already own
• Consolidate A/C models and parts; save by reducing inventories and suppliers
• Eliminate labor to modify or cut existing cut-outs for unit upgrades
• Maintain Type 12 and IP54 ratings

MONITOR AND MANAGE THE HEALTH OF YOUR ENTIRE COOLING SYSTEM FROM YOUR PC
Hoffman SpectraCool Remote Access Control is a parametric controller designed for monitoring and management of an entire network of SpectraCool air conditioners. Available as a factory-installed option integrated with select SpectraCool models, remote access control assigns a unique IP address to each equipped unit to monitor and control operation from a personal computer via USB using Modbus, or Ethernet using SNMP or EtherNet/IP. Units are pre-programmed with heating and cooling setpoints that can be viewed and easily adjusted to changing needs.

FEATURES
• Direct and remote control of cooling, heating, alarms, compressor, ambient fan, and controller
• Integrated 3-digit display of status codes and cabinet temperature
• Seven non-latching alarm conditions including door open, smoke detection, high pressure, air inlet and outlet temperature sensors, low temperature, high temperature, and frost.
A ROBUST SOLUTION FOR COOLING CABINS IN THE TOUGHEST INDUSTRIAL ENVIRONMENTS

Hoffman® ClimaGuard™ Air-to-Water Heat Exchangers are an efficient, maintenance-free, and low-noise solution for cooling indoor enclosures in industrial applications. Unaffected by airborne contaminants with no moving parts exposed to the environment, these side-mount heat exchangers outperform passive cooling solutions and fans. ClimaGuard heat exchangers are ideal for applications exposed to high-ambient temperatures and/or extremely dusty and dirty conditions that make traditional air conditioners susceptible to mechanical failures.

FEATURES
- 870 Watt to 12,500 Watt (3,000 to 42,650 BTUs/h) available capacities
- Patented system for recovery and evacuation of condensation (REC)
- Filterless design for ease of maintenance
- Regulating mechanical thermostat
- 115 or 230 VAC power supply

COMPRESSOR-FREE AIR CONDITIONING FOR SMALL INDOOR OR OUTDOOR ENCLOSURES

Hoffman Thermoelectric Coolers provide reliable, Peltier-effect cooling in small-space environments where conventional cooling methods are not feasible. Refrigerant-free, filterless design requires no compressor and virtually eliminates maintenance.

FEATURES
- 13 standard models
- Cooling capacities from 60 to 200 Watt (nominal); (204 to 682 BTUs/h)
- Broad operating temperature range of -40 °C to 55 °C/-40 °F to 131 °F
- DC powered operation for 24 V and 48 V applications
- Optional temperature controller and condensate manager

SIDEMOUNT FILTER FANS

Hoffman Filter Fans are available in a wide selection of Type 1, Type 12, and Type 3R models offering compact, click-fit design for easy installation in the tightest spaces.

FEATURES
- Airflows ranging from 28 m³/h to 970 m³/h (16 CFM to 571 CFM)
- Sizes with shallow depth models to fit tight spaces
- Reverse airflow option to push/pull air through higher static pressure
- Similar cut-out sizes to match other filter fan manufacturers

HIGHLY RELIABLE AND VIRTUALLY MAINTENANCE-FREE COOLING

Hoffman Vortex A/C Enclosure Coolers offer dependable operation with almost no moving parts. Designed for use with a compressed air supply, Vortex A/C units are ideal for high-performance cooling in ambient temperatures up to 80 °C/175 °F, dirty, corrosive or humid environments, and many hazardous location classes.

FEATURES
- Multiple cooling capacities available from 264 Watt (900 BTUs/h) to 1,465 Watt (5,000 BTUs/h)
- Requires just 1/10th of the space for comparable air conditioner units
- Up to 78 percent quieter than traditional tube vortex coolers
- NEMA 12, NEMA 4/4X and Class I, Div. 2, Class II, Div. 2 and Class III hazardous location-rated models available

FOR MORE INFORMATION: HOFFMANONLINE.COM
With Pentair, you’re assured of the most complete maintenance and service offerings. That means reduced downtime, higher levels of overall system performance, and maximum operational life for your protected equipment. Our product quality and complete aftermarket care keeps your equipment running.

Pentair offers pre- and post-sales services and support to let you choose the right cooling product for the job, and tailor the level of assurance you need to mitigate risks. Our plans and offerings include:

• A choice of flexible service plans that can be customized to your needs
• Extended product warranties
• Operator and maintenance training programs
• Custom installation, commissioning, and upgrades

AN UNRIVALED STRATEGIC PARTNERSHIP FOR THE MOST RESPONSIVE LOCAL SERVICE

Through partnership with Johnson-Northwest, Pentair offers unsurpassed service presence and response in North America with expertise that reaches worldwide. JNW delivers full-service capabilities and complete in- and out-of-warranty service for Hoffman cooling products from over 570 local service locations in North America and 6,700 authorized technicians worldwide.

THROUGH JNW, HOFFMAN OFFERS

• 24/7/365 service availability
• Online service requests
• Factory-authorized expertise to service all Hoffman and McLean® models and many competitor models
• Local service
• In-stock availability for selected cooling parts

• Global coordination of service and maintenance programs
• Expedited service and parts availability
• Extensive reporting capabilities including up-to-date status monitoring
• Automatic emails about change-to-repair-order status
PEACE-OF-MIND
INCLUDED WITH EVERY HOFFMAN PRODUCT

TWO YEARS STANDARD WARRANTY
Hoffman Cooling products are warranted to be free from manufacturing defects in materials and workmanship for two years from date of shipment.*

EXTENDED COVERAGE AVAILABLE
Reduce the risk of unplanned repair costs and budget for predictable operating expenses with an extended coverage plan from Hoffman.

* Subject to certain conditions and exclusions.

PARTS BUNDLES HELP YOU STAY PREPARED
Designed for your specific Hoffman Cooling units and to anticipate the requirements of your applications, our maintenance and field support bundles offer essential parts to maintain your equipment or restore operation in the event of a failure. Maintenance and support bundles can be purchased when the unit is installed, or any time after the unit is put into service.

HOFFMAN MAINTENANCE BUNDLES
- Includes the necessary consumables required to perform scheduled maintenance on your Hoffman unit

HOFFMAN SUPPORT BUNDLES
- Includes critical service parts designed to quickly restore operation in the event of a breakdown
- Tailored to your Hoffman Cooling model and application

LOCAL AVAILABILITY MEANS PARTS IN HOURS, NOT WEEKS
In each global region, our local distributors have access to large inventories of service parts. Repair technicians worldwide can place parts orders regionally, eliminating communication barriers and ordering delays. Hoffman parts are usually available in-stock or shipped within hours, versus shipping delays that can last weeks.

PARTS BUNDLES HELP YOU STAY PREPARED

HOFFMAN MAINTENANCE BUNDLES
- Includes the necessary consumables required to perform scheduled maintenance on your Hoffman unit

HOFFMAN SUPPORT BUNDLES
- Includes critical service parts designed to quickly restore operation in the event of a breakdown
- Tailored to your Hoffman Cooling model and application

OVER 1,000 COOLING SPARE PARTS AVAILABLE

When you need THEM

CUSTOM ENGINEERING DEVELOPMENT, TESTING & CERTIFICATION CAPABILITIES

ENGINEERED SOLUTIONS TO MEET YOUR COOLING CHALLENGES
Pentair can custom-engineer cooling solutions for many enclosed controls, electronic devices or electrical systems.
- Design and build capabilities to perform in extreme environments
- Rapid prototyping
- UL/CSD certified testing facility and capabilities to meet global certification standards
- 60+ years of custom engineering experience

Custom cooling projects are engineered to meet performance demands for thermal loads, size and configuration considerations, and environmental requirements. Solutions include:
- Closed- or open-loop cooling
- Indoor and outdoor environments
- Remote monitoring and control capabilities
- Direct air cooling systems
- General, targeted or remote cooling
- Low- to no-maintenance solutions
- Custom packaged blowers and fan assemblies
- High-efficiency AC and DC power solutions and battery backup options
- Corrosion-resistant designs, materials and finishes including stainless steel, non-metallic materials, coatings, and paints
- Proven, environmentally friendly components
- Thermal and environmental management solutions including heating, condensation management, pressure compensation, temperature monitoring, and control

Superior cooling solutions driven by highly experienced engineering and design teams

OUR DEVELOPMENT PROCESS ENSURES TIMELY DELIVERY
All custom cooling projects are assigned a lead thermal engineer and supported by a dedicated cross-functional team. Using proprietary software to develop cooling system prototypes, cooling performance is calculated and simulated utilizing different technologies, configurations, and sizes prior to build. Prototypes can be developed in as little as two weeks.

TESTING AND CERTIFICATION
A battery of advanced testing is available with mechanical and environmental stresses measured beyond industry standards, including temperature extremes, airflow, UV, dust, corrosion and salt spray, seismic and vibration, EMI/RFI, and water ingress. Each system can be engineered to meet UL, cUL, CSA, Telcordia, NEMA, IEC, European Safety, and FCC compliances and standards.

State-of-the-art engineering, prototyping and testing combined with uncompromising manufacturing delivers optimal performance
